

# Reversing CryptoCrazy Ransomware - PoC Decryptor and some Tricks

Published: 2021-10-30 · Archived: 2026-04-02 10:56:33 UTC

This video serves for educational purposes and covers reversing of CryptoCrazy Ransomware . This Ransomware is based on OpenSource code (Povlsomware) and is very simple so the reversing is pretty straight-forward. This video covers guide during reversing and making PoC decryptor in Python. In the last part of the video I will be covering another Trick how you can dynamically invoke only the decryption routine of this Ransomware directly from Powershell and get all files decrypted.
