

Cloud Products | Microsoft Azure

Archived: 2026-04-05 13:40:44 UTC

AI + machine learning

Create the next generation of applications using artificial intelligence capabilities for any developer and any scenario.

Microsoft Foundry

The AI app and agent factory.

Azure AI Bot Service

Create bots and connect them across channels.

Azure AI Search

Connect agents to one unified context layer for data sources, memory and retrieval-augmented generation (RAG) pipelines.

Azure Databricks

Design AI with Apache Spark™-based analytics.

Azure Machine Learning

Use an enterprise-grade service for the end-to-end machine learning lifecycle.

Azure Open Datasets

Cloud platform to host and share curated open datasets to accelerate development of machine learning models.

Foundry Tools

Build cutting-edge, market-ready AI applications with customizable tools, APIs, and models.

Azure AI Video Indexer

Easily extract meaningful insights from audio and video files using media AI.

Azure AI Custom Vision

Easily customize your own state-of-the-art computer vision models for your unique use case.

Data Science Virtual Machines

Rich pre-configured environment for AI development.

Azure Language in Foundry Tools

Build apps that understand, analyze, and generate human language with AI.

Azure Translator in Foundry Tools

Break language barriers with instant, AI-powered translation.

Azure AI Metrics Advisor

An AI service that monitors metrics and diagnoses issues.

Azure OpenAI in Foundry Models

Apply advanced coding and language models to a variety of use cases.

Azure AI Personalizer

Deliver personalized, relevant experiences for each of your users.

Content Safety in Foundry Control Plane

Automated image, text, and video moderation.

Health Bot

A managed service purpose-built for development of virtual healthcare assistants.

Azure Document Intelligence in Foundry Tools

Accelerate information extraction from documents.

AI Anomaly Detector

Easily add anomaly detection capabilities to your apps.

Foundry Models

Empowering you to find the best model for every use case.

Microsoft Security Copilot

Protect at the speed and scale of AI with a generative AI-powered assistant.

Azure AI Immersive Reader

Empower users of all ages and abilities to read and comprehend text.

Phi open models

A family of powerful, small language models (SLMs) with groundbreaking performance at low cost and low latency.

Azure Content Understanding in Foundry Tools

Accelerate multimodal AI agent development.

Azure Speech in Foundry Tools

Energize your apps and agents with prebuilt, customizable, multilingual speech AI models.

Microsoft Planetary Computer Pro

Unify geospatial data with enterprise AI and analytics to enhance business decisions.

Foundry Agent Service

Create AI agents that automate complex business processes—completing specific tasks while keeping humans in control.

Azure SRE Agent

Automate repetitive tasks and improve incident response using an autonomous incident mitigation and resource optimization agent with intelligent precision.

Observability in Foundry Control Plane

Observe and optimize AI apps and agents with end-to-end monitoring, tracing, and evaluation.

Azure Vision in Foundry Tools

Discover vision AI from image and video analysis.

Foundry IQ

Unlock ubiquitous knowledge for agents. Deliver superior results with AI agents grounded on organizational data.

Analytics

Gather, store, process, analyse and visualise data of any variety, volume or velocity.

Azure Analysis Services

Enterprise-grade analytics engine as a service.

Azure Data Explorer

Fast and highly scalable data exploration service.

Azure Data Factory

Hybrid data integration at enterprise scale, made easy.

Azure Data Lake Storage

Scalable, secure data lake for high-performance analytics.

Azure Data Share

A simple and safe service for sharing big data with external organizations.

Azure Databricks

Design AI with Apache Spark™-based analytics.

Azure Stream Analytics

Real-time analytics on fast-moving streaming data.

Azure Synapse Analytics

Limitless analytics with unmatched time to insight.

Data Catalog

Get more value from your enterprise data assets.

Data Lake Analytics

Distributed analytics service that makes big data easy.

Event Hubs

Receive telemetry from millions of devices.

HDInsight

Provision cloud Hadoop, Spark, R Server, HBase, and Storm clusters.

Power BI Embedded

White label Power BI to quickly and easily provide exceptional customer facing dashboards and analytics in your own applications.

Microsoft Graph Data Connect

A secure, high-throughput connector designed to copy select Microsoft 365 productivity datasets into your Azure tenant.

Azure Chaos Studio

Improve application resilience by simulating outages and other disruptions through fault injection.

Microsoft Fabric

Reshape how everyone accesses, manages, and acts on data and insights by connecting every data source and analytics service together—on a single, AI-powered platform.

Microsoft Purview

Govern, protect, and manage your data estate.

Power BI

Transform your data into interactive, shareable insights with AI-powered dashboards and reports.

Microsoft Planetary Computer Pro

Unify geospatial data with enterprise AI and analytics to enhance business decisions.

Compute

Access cloud compute capacity and scale on demand—and only pay for the resources you use.

App Service

Quickly create powerful cloud apps for web and mobile.

Azure Compute Fleet

Easily provision and manage Azure compute capacity at scale.

Azure Quantum

Jump in and explore a diverse selection of today's quantum hardware, software, and solutions.

Azure Spot Virtual Machines

Provision unused compute capacity at deep discounts to run interruptible workloads.

Azure Spring Apps

Build and deploy Spring Boot applications with a fully managed service from Microsoft and VMware.

Azure VMware Solution

Run your VMware workloads natively on Azure.

Batch

Cloud-scale job scheduling and compute management.

Cloud Services

Create highly-available, infinitely-scalable cloud applications and APIs.

Linux Virtual Machines

Provision virtual machines for Ubuntu, Red Hat, and more.

SQL Server on Azure Virtual Machines

Migrate SQL Server workloads to the cloud at lower total cost of ownership (TCO).

Static Web Apps

Streamlined full-stack development from source code to global high availability.

Virtual Machine Scale Sets

Manage and scale up to thousands of Linux and Windows VMs.

Virtual Machines

Provision Windows and Linux VMs in seconds.

Azure Virtual Desktop

Enable a secure, remote desktop experience from anywhere.

Windows Server

Trusted cloud platform for your Windows Server workloads

Azure Dedicated Host

A dedicated physical server to host your Azure VMs for Windows and Linux.

Azure VM Image Builder

Simplify your image building process with easy to use tool.

Azure Kubernetes Service (AKS)

Deploy and scale containers on managed Kubernetes.

Azure Functions

Execute event-driven serverless code functions with an end-to-end development experience.

Azure Container Instances

Launch containers with hypervisor isolation.

Azure Container Apps

Build and deploy modern apps and microservices using serverless containers.

Nutanix Cloud Clusters

Optimize costs and simplify scale, flexibility, app migration, and disaster recovery for your Nutanix workloads.

Containers

Develop and manage your containerized applications faster with integrated tools.

App Configuration

Fast, scalable parameter storage for app configuration.

Azure Kubernetes Service (AKS)

Deploy and scale containers on managed Kubernetes.

Azure Kubernetes Fleet Manager

Seamlessly manage Kubernetes clusters at scale.

Azure Red Hat OpenShift

Deploy and scale containers on managed Red Hat OpenShift.

Azure Container Apps

Build and deploy modern apps and microservices using serverless containers.

Azure Functions

Execute event-driven serverless code functions with an end-to-end development experience.

Azure Container Instances

Launch containers with hypervisor isolation.

Azure Container Registry

Build, store, secure, and replicate container images and artifacts.

Azure Container Storage

Manage persistent volumes for stateful container applications.

Databases

Support rapid growth and innovate faster with secure, enterprise-grade, and fully managed database services.

Azure Cosmos DB

Build or modernize scalable, high-performance apps.

Azure DocumentDB

Build AI-driven apps and standardize on an open-source, MongoDB-compatible engine.

Azure SQL

Migrate, modernize, and innovate on the modern SQL family of cloud databases.

Azure SQL Database

Build apps that scale with a managed and intelligent SQL database in the cloud.

Azure SQL Managed Instance

Modernize SQL Server applications with a managed, always-up-to-date SQL instance in the cloud.

SQL Server on Azure Virtual Machines

Migrate SQL Server workloads to the cloud at lower total cost of ownership.

Azure Database for PostgreSQL

Innovate with a fully managed, intelligent, and scalable PostgreSQL database.

Azure Database for MySQL

Modernize with a fully managed, scalable MySQL database.

Azure Managed Redis

Take advantage of a fully managed, in-memory database with the latest Redis innovations.

Azure Database Migration Service

Simplify your data migration to Azure.

Azure Managed Instance for Apache Cassandra

Modernize Cassandra data clusters with a managed instance in the cloud.

Azure Data Factory

Simplify hybrid data integration at enterprise scale.

Table Storage

Get a NoSQL key-value store using semi-structured datasets.

Azure confidential ledger

Protect data with a tamperproof, unstructured data store hosted in trusted execution environments (TEEs) and backed by cryptographically verifiable evidence.

Azure HorizonDB

Build and scale mission-critical applications on a new PostgreSQL cloud database service engineered for performance.

App Configuration

Fast, scalable parameter storage for app configuration.

Azure DevOps

Services for teams to share code, track work, and ship software.

Azure DevTest Labs

Quickly create environments using reusable templates and artifacts.

Azure Pipelines

Continuously build, test, and deploy to any platform and cloud.

SDKs

Get the SDKs and command-line tools you need.

Visual Studio

Powerful and flexible environment to develop apps in the cloud.

Visual Studio Code

A powerful, lightweight code editor for cloud development.

Azure App Testing

Optimize app performance with high-scale load testing.

Microsoft Dev Box

Streamline development with secure, ready-to-code workstations in the cloud.

Azure Deployment Environments

Quickly spin up app infrastructure environments with project-based templates.

Microsoft Playwright Testing

Scalable end-to-end modern web app testing service.

Artifact Signing

Secure your applications with a fully managed end-to-end signing service for code, documents, applications, and more.

DevOps

Deliver innovation faster with simple, reliable tools for continuous delivery.

Azure Artifacts

Create, host, and share packages with your team.

Azure Boards

Plan, track, and discuss work across your teams.

Azure DevOps

Services for teams to share code, track work, and ship software.

Azure DevTest Labs

Quickly create environments using reusable templates and artifacts.

Azure Monitor

Full observability into your applications, infrastructure, and network.

Azure Pipelines

Continuously build, test, and deploy to any platform and cloud.

Azure Repos

Get unlimited, cloud-hosted private Git repos for your project.

Azure Test Plans

Test and ship confidently with an exploratory test toolkit.

DevOps tool integrations

Use your favorite DevOps tools with Azure.

Azure App Testing

Optimize app performance with high-scale load testing.

Azure Managed Grafana

Deploy Grafana dashboards as a fully managed Azure service.

Microsoft Dev Box

Streamline development with secure, ready-to-code workstations in the cloud.

Azure Deployment Environments

Quickly spin up app infrastructure environments with project-based templates.

GitHub Advanced Security for Azure DevOps

Develop securely from inception to ship.

Microsoft Playwright Testing

Scalable end-to-end modern web app testing service.

GitHub Enterprise

Unlock innovation at scale with GitHub Enterprise and Microsoft Azure.

GitHub Advanced Security

Empower your developers to work better together, fix security issues faster, and reduce overall security risk.

GitHub Copilot

Increase software development velocity and inspire continuous innovation with GitHub Copilot, the world's most widely adopted AI developer tool.

Azure SRE Agent

Automate repetitive tasks and improve incident response using an autonomous incident mitigation and resource optimization agent with intelligent precision.

Hybrid + multicloud

Get Azure innovation everywhere—bring the agility and innovation of cloud computing to your on-premises workloads.

Azure Arc

Secure, develop, and operate infrastructure, apps, and Azure services anywhere.

Azure Database for PostgreSQL

Fully managed, intelligent, and scalable PostgreSQL.

Azure DevOps

Services for teams to share code, track work, and ship software.

Azure ExpressRoute

Experience a fast, reliable, and private connection to Azure.

Azure IoT Edge

Extend cloud intelligence and analytics to edge devices.

Microsoft Sentinel

Cloud-native SIEM and intelligent security analytics.

Azure SQL Database

Build apps that scale with managed and intelligent SQL database in the cloud.

Microsoft Defender for Cloud

Extend threat protection to any infrastructure.

Azure Local

Run your production workloads anywhere on a cloud connected distributed infrastructure.

Azure Stack Hub

Azure Stack Hub is sold as an integrated hardware system, with software pre-installed on validated hardware.

Azure Stack Edge

An Azure managed device that brings the compute, storage, and intelligence of Azure to the edge.

Azure Operator Service Manager

Simplify the deployment, upgrade, and management of complex operator services.

Azure Operator Nexus

Discover a hybrid platform built for mission-critical mobile network applications and can support deployment of both containerized and virtualized network functions.

Identity

Manage user identities and access to protect against advanced threats across devices, data, apps, and infrastructure.

Microsoft Entra ID (formerly Azure AD)

Synchronize on-premises directories and enable single sign-on.

Microsoft Entra Domain Services

Manage your domain controllers in the cloud.

Microsoft Entra Verified ID

Build unique user-owned identity scenarios designed for trustworthy, secure, and efficient interactions between people and organizations.

Microsoft Entra External ID

Personalize and help secure access to any application for customers and partners.

Integration

Seamlessly integrate on-premises and cloud-based applications, data, and processes across your enterprise.

API Management

Publish APIs to developers, partners, and employees securely and at scale.

Azure Health Data Services

Unify and manage health data and protected health information (PHI) in the cloud.

Event Grid

Reliable event delivery at massive scale.

Logic Apps

Automate the access and use of data across clouds.

Service Bus

Connect across private and public cloud environments.

Azure Web PubSub

Easily build real-time messaging web applications using WebSockets and the publish-subscribe pattern.

Microsoft Energy Data Services

Accelerate your journey to energy data modernization and digital transformation.

Internet of Things

Use a set of scalable, modular, edge services, built on industry standards to easily capture device and equipment data, process and normalize it at the edge, and seamlessly send and receive operational insights to and from the cloud.

API Management

Publish APIs to developers, partners, and employees securely and at scale.

Azure Cosmos DB

Build or modernize scalable, high-performance apps.

Azure Digital Twins

Use IoT spatial intelligence to create models of physical environments.

Azure IoT Central

Go from proof of concept to proof of value.

Azure IoT Edge

Extend cloud intelligence and analytics to edge devices.

Azure IoT Hub

Connect, monitor, and manage billions of IoT assets.

Azure IoT Operations

Unlock insights for intelligent local actions and global visibility. Enabled by Azure Arc.

Azure Functions

Execute event-driven serverless code functions with an end-to-end development experience.

Azure Machine Learning

Use an enterprise-grade service for the end-to-end machine learning lifecycle.

Azure Maps

Add location data and mapping visuals to business applications and solutions.

Azure Stream Analytics

Real-time analytics on fast-moving streaming data.

Notification Hubs

Send push notifications to any platform from any back end.

Windows for IoT

Build intelligent edge solutions with world-class developer tools, long-term support, and enterprise-grade security.

Logic Apps

Automate the access and use of data across clouds.

Azure Sphere

Create, connect, and maintain secured intelligent IoT devices from the edge to the cloud.

Event Grid

Reliable event delivery at massive scale.

Management and governance

Simplify, automate, and optimize the management and compliance of your cloud resources.

Azure Copilot

Harness the collective intelligence of Azure agents with an AI companion.

Automation

Simplify cloud management with process automation.

Azure Advisor

Your personalized Azure best practices recommendation engine.

Defender External Attack Surface Management

Safeguard the digital experience by discovering all internet-exposed resources with Microsoft Defender External Attack Surface Management (EASM).

Azure Backup

Simplify data protection with built-in backup management at scale.

Azure Blueprints

Enabling quick, repeatable creation of governed environments.

Azure Lighthouse

Empowering service providers to manage customers at scale and with precision.

Azure Managed Applications

Simplify management of cloud offerings.

Azure Migrate

Simplify migration and modernization with a unified platform.

Microsoft Purview

Govern, protect, and manage your data estate.

Azure Monitor

Full observability into your applications, infrastructure, and network.

Azure Policy

Implement corporate governance and standards at scale.

Azure Resource Manager

Simplify how you manage your app resources.

Azure Resource Manager templates

Deliver infrastructure as code for all your Azure resources using Resource Manager.

Azure Chaos Studio

Improve application resilience by introducing faults and simulating outages.

Azure Site Recovery

Keep your business running with built-in disaster recovery service.

Cloud Shell

Streamline Azure administration with a browser-based shell.

Microsoft Cost Management

Monitor, allocate, and optimize cloud costs with transparency, accuracy, and efficiency.

Azure Managed Grafana

Deploy Grafana dashboards as a fully managed Azure service.

Azure Network Watcher

Network performance monitoring and diagnostics solution.

Azure Traffic Manager

Route incoming traffic for high performance and availability.

Azure Automanage

Effortless automation of cloud and on-premises infrastructure.

Azure Resource Mover

Simplify how you move multiple resources between Azure regions.

Update management center

Centrally manage updates and compliance at scale.

Azure SRE Agent

Automate repetitive tasks and improve incident response using an autonomous incident mitigation and resource optimization agent with intelligent precision.

Content Delivery Network

Fast, reliable content delivery network with global reach.

Migration

Simplify and accelerate your migration to the cloud with guidance, tools, and resources.

Azure Database Migration Service

Accelerate your data migration to Azure.

Azure Migrate

Simplify migration and modernization with a unified platform.

Azure Site Recovery

Keep your business running with built-in disaster recovery service.

Microsoft Cost Management

Monitor, allocate, and optimize cloud costs with transparency, accuracy, and efficiency.

Azure Data Box

Accelerate offline data migration to Azure with Azure Data Box. Move massive datasets fast, without network bandwidth.

Azure Storage Mover

Explore Azure Storage Mover to migrate data to Azure from on-premises or another cloud. Simplify migration with safe, scalable transfers built for modernization.

Mixed reality

Blend your physical and digital worlds to create immersive, collaborative experiences.

Azure Digital Twins

Use IoT spatial intelligence to create models of physical environments.

Mobile

Build and deploy cross-platform and native apps for any mobile device.

API Management

Publish APIs to developers, partners, and employees securely and at scale.

App Configuration

Fast, scalable parameter storage for app configuration.

App Service

Quickly create powerful cloud apps for web and mobile.

Azure AI Search

Enterprise scale search for app development.

Azure Maps

Add location data and mapping visuals to business applications and solutions.

Azure Communication Services

Build multichannel communication experiences.

Notification Hubs

Send push notifications to any platform from any back end.

Networking

Connect cloud and on-premises infrastructure and services to provide your customers and users the best possible experience.

Azure Application Gateway

Build secure, scalable, highly available web front ends in Azure.

Azure Bastion

Fully managed service that helps secure remote access to your virtual machines.

Azure DDoS Protection

Protect your Azure resources from distributed denial-of-service (DDoS) attacks.

Azure DNS

Host your Domain Name System (DNS) domain in Azure.

Azure ExpressRoute

Experience a fast, reliable, and private connection to Azure.

Azure Firewall

Protect your Azure Virtual Network resources with cloud-native network security.

Azure Content Delivery Network

Fast, reliable content delivery network with global reach.

Azure Route Server

Enable network appliances to exchange routes dynamically with virtual networks in Azure.

Azure Web Application Firewall

A cloud-native web application firewall (WAF) service that provides powerful protection for web apps.

Azure Front Door

Modern cloud CDN that delivers optimized experiences to your users anywhere.

Azure Network Function Manager

Extend Azure management for deploying 5G and SD-WAN network functions on edge devices.

Azure Virtual Network Manager

Centrally manage virtual networks in Azure from a single pane of glass.

Azure NAT Gateway

Provide highly reliable, secure, and scalable outbound connectivity to the internet.

Azure Load Balancer

Deliver high availability and network performance to your apps.

Azure Private Link

Private access to services hosted on the Azure platform, keeping your data on the Microsoft network.

Azure Firewall Manager

Central network security policy and route management for globally distributed, software-defined perimeters.

Azure Network Watcher

Network performance monitoring and diagnostics solution.

Azure Traffic Manager

Route incoming traffic for high performance and availability.

Azure Virtual Network

Create your own private network infrastructure in the cloud.

Azure Virtual WAN

Optimize and automate branch to branch connectivity through Azure.

Azure VPN Gateway

Establish secure, cross-premises connectivity.

Security

Protect your enterprise from advanced threats across hybrid cloud workloads.

Azure App Configuration

Fast, scalable parameter storage for app configuration.

Azure Application Gateway

Build secure, scalable, highly available web front ends in Azure.

Microsoft Entra Domain Services

Manage your domain controllers in the cloud.

Microsoft Defender for Cloud

Protect your multi-cloud and hybrid environments.

Microsoft Defender External Attack Surface Management

Safeguard the digital experience by discovering all internet-exposed resources with Microsoft Defender External Attack Surface Management (EASM).

Azure Bastion

Fully managed service that helps secure remote access to your virtual machines.

Azure DDoS Protection

Protect your Azure resources from distributed denial-of-service (DDoS) attacks.

Azure Cloud HSM

Fully managed, customer-owned, single-tenant hardware security module that provides secure key storage and cryptographic operations within your private virtual network.

Azure Firewall

Protect your Azure Virtual Network resources with cloud-native network security.

Azure Firewall Manager

Central network security policy and route management for globally distributed, software-defined perimeters.

Azure Front Door

Modern cloud CDN that delivers optimized experiences to your users anywhere.

Azure Information Protection

Better protect your sensitive information—anytime, anywhere.

Microsoft Sentinel

Cloud-native SIEM and intelligent security analytics.

Azure Key Vault

Safeguard and maintain control of keys and other secrets.

Azure confidential ledger

Tamperproof, unstructured data store hosted in trusted execution environments (TEEs) and backed by cryptographically verifiable evidence.

Azure VPN Gateway

Establish secure, cross-premises connectivity.

Azure Web Application Firewall

A cloud-native web application firewall (WAF) service that provides powerful protection for web apps.

Microsoft Azure Attestation

A unified solution for remotely verifying the trustworthiness of a platform and integrity of the binaries running inside it.

Microsoft Security Copilot

Protect at the speed and scale of AI with a generative AI-powered assistant.

Storage

Get secure, massively scalable cloud storage for your data, apps, and workloads.

Archive Storage

Industry leading price point for storing rarely accessed data.

Azure Managed Lustre

Azure Managed Lustre is a fully managed, cloud based parallel file system that enables customers to run their high performance computing (HPC) workloads in the cloud.

Azure Backup

Simplify data protection with built-in backup management at scale.

Azure Data Lake Storage

Scalable, secure data lake for high-performance analytics.

Azure Data Share

A simple and safe service for sharing big data with external organizations.

Azure Files

Simple, secure and serverless enterprise-grade cloud file shares.

Azure Storage Actions

Simplify storage data management at massive scale.

Azure NetApp Files

Enterprise-grade Azure file shares, powered by NetApp.

Azure Blob Storage

Massively scalable and secure object storage.

Azure Data Box

Accelerate offline data migration to Azure with Azure Data Box. Move massive datasets fast, without network bandwidth.

Azure Disk Storage

High-performance, highly durable block storage.

Azure confidential ledger

Tamperproof, unstructured data store hosted in trusted execution environments (TEEs) and backed by cryptographically verifiable evidence.

Azure Elastic SAN

Elastic SAN is a cloud-native Storage Area Network (SAN) service built on Azure. Gain access to an end-to-end experience like your on-premises SAN.

Queue Storage

Effectively scale apps according to traffic.

Storage Accounts

Durable, highly available, and massively scalable cloud storage.

Storage Explorer

View and interact with Azure Storage resources.

Azure Container Storage

Manage persistent volumes for stateful container applications.

Azure Storage Discovery

Unlock storage insights with Azure Storage Discovery. Gain visibility with Azure storage monitoring and hone your data strategy with storage solutions insights.

Virtual desktop infrastructure

Empower employees to work securely from anywhere with a cloud-based virtual desktop infrastructure.

Azure Lab Services

Set up virtual labs for classes, training, hackathons, and other related scenarios.

Azure Virtual Desktop

Enable a secure, remote desktop experience from anywhere.

Microsoft Dev Box

Streamline development with secure, ready-to-code workstations in the cloud.

Web

Build, deploy, and scale powerful web applications quickly and efficiently.

API Management

Publish APIs to developers, partners, and employees securely and at scale.

App Configuration

Fast, scalable parameter storage for app configuration.

App Service

Quickly create powerful cloud apps for web and mobile.

Azure AI Search

Enterprise scale search for app development.

Azure Maps

Add location data and mapping visuals to business applications and solutions.

Azure SignalR Service

Add real-time web functionalities easily.

Azure Content Delivery Network

Fast, reliable content delivery network with global reach.

Notification Hubs

Send push notifications to any platform from any back end.

Static Web Apps

Streamlined full-stack development from source code to global high availability.

Azure Communication Services

Build multichannel communication experiences.

Azure Web PubSub

Easily build real-time messaging web applications using WebSockets and the publish-subscribe pattern.

Azure Fluid Relay

Easily add real-time collaborative experiences to your apps with Fluid Framework.

Microsoft Playwright Testing

Scalable end-to-end modern web app testing service.

Azure Container Apps

Build and deploy modern apps and microservices using serverless containers.
