|-------------|--|
| Names | Maxtrilha |
| Category | Malware |
| Type | Banking trojan |
| Description | (Segurança Informática) A new banking trojan dubbed maxtrilha (due to its encryption key) has been discovered in the last few days and targeting customers of European and South American banks. Criminals are constantly creating variants of popular banking trojans, keeping in mind the same modus operandi but changing the malware internals and its capabilities making it a fully undetectable (FUD) weapon. |
