

# Zeus (Malware Family)

By Fraunhofer FKIE

Archived: 2026-04-06 00:51:27 UTC

According to CrowdStrike, The two primary goals of the Zeus trojan horse virus are stealing people's financial information and adding machines to a botnet. Unlike many types of malware, most Zeus variants try to avoid doing long-term damage to the devices they infect. Their aim is to avoid detection from antivirus software.
