Please note that these free tools are provided as-is and without warranty of any kind. The tools may only work with specific ransomware versions, and may not work with versions that were released after a tool was created. Technical support for the tools is available only to customers using a paid Emsisoft product.

The Maze, Sekhmet, and Egregor ransomwares encrypt victim's files using ChaCha8, and append a random extension.

An example ransom note is below:
