Tool: RDPWrap

Names	RDPWrap
Category	Malware
Type	Backdoor
Description	(AnyViewer) Many users of RDP may have heard of RDP Wrapper before. RDP Wrapper works as a layer between Service Control Manager and Terminal Services. Or say, it's like a pipe, which connects Service Control Manager and Terminal Services. It enables Remote Desktop Host support and concurrent RDP sessions. Instead of modifying termsrv.dll file, the original termsrv.dll file remains untouched.
