

# Botnet C&C | Botnet Threat Update January to June 2025 | Report

Archived: 2026-04-05 16:40:15 UTC

report

Botnet activity increased by 26% this reporting period; the first increase we've observed for over 18 months. Five new malware families entered the Top 20, and disappointing increases for a number of global networks hosting the most active botnet command & controllers (C&Cs). Read the full report.
