

NetSupportManager RAT (Malware Family)

By Fraunhofer FKIE

Archived: 2026-04-05 14:11:10 UTC

Enigma Software notes that NetSupport Manager is a genuine application, which was first released about twenty years ago. The purpose of the NetSupport Manager tool is to enable users to receive remote technical support or provide remote computer assistance. However, cyber crooks have hijacked this useful application and misappropriated it to use it in their harmful campaigns. The name of the modified version of the NetSupport Manager has been labeled the NetSupport Manager RAT.
