

# **BITS Jobs Mitigation, Mitigation T1197 - Enterprise**

By Authorization Enforcement

Archived: 2026-04-05 15:52:59 UTC

## **Deprecation Warning**

This type of attack technique cannot be easily mitigated with preventive controls since it is based on the abuse of operating system design features. For example, disabling all BITS functionality will likely have unintended side effects, such as preventing legitimate software patching and updating. Efforts should be focused on preventing adversary tools from running earlier in the chain of activity and on identification of subsequent malicious behavior.
