

Detection of Remote Device Management Services, Detection Strategy DET0702

Archived: 2026-04-05 13:53:46 UTC

AN1820

Google sends a notification to the device when Android Device Manager is used to locate it. Additionally, Google provides the ability for users to view their general account activity and alerts users when their credentials have been used on a new device. Apple iCloud also provides notifications to users of account activity such as when credentials have been used.
