Tool: FlokiBot

Names	FlokiBot
Category	Malware
Type	Banking trojan , POS malware , Backdoor , Info stealer , Credential stealer
Description	(Talos) Floki Bot is another example of what happens when the source code of successful malware kits gets leaked online. As we have seen several times since the Zeus source code became available, new malware variants based on this codebase continue to emerge. Floki Bot is unique in that the authors of this malware have put effort into expanding upon the functionality that was present in Zeus and have implemented new functionality making Floki Bot very attractive to criminals.
