

Houdini (Malware Family)

By Fraunhofer FKIE

Archived: 2026-04-06 00:50:15 UTC

Houdini is a VBS-based RAT dating back to 2013. Past in the days, it used to be wrapped in an .exe but started being spamvertized or downloaded by other malware directly as .vbs in 2018. In 2019, WSHRAT appeared, a Javascript-based version of Houdini, recoded by the name of Kognito.
