

# Detection of Call Log, Detection Strategy DET0602

Archived: 2026-04-05 13:44:09 UTC

## AN1650

Application vetting services could look for `android.permission.READ_CALL_LOG` in an Android application's manifest. Most applications do not need call log access, so extra scrutiny could be applied to those that request it. On Android, the user can manage which applications have permission to access the call log through the device settings screen, revoking the permission if necessary.
