

ATOMSILO (Malware Family)

By Fraunhofer FKIE

Archived: 2026-04-05 16:42:57 UTC

According to PCrsk, AtomSilo is a type of malware that blocks access to files by encrypting them and renames every encrypted file by appending the ".ATOMSILO" to its filename. It renames "1.jpg" to "1.jpg.ATOMSILO", "2.jpg" to "2.jpg.ATOMSILO", and so on. As its ransom note, AtomSilo creates the "README-FILE-#COMPUTER-NAME#-#CREATION-TIME#.hta" file.
