[Wilson Connectivity, Autonomous Systems team for in-building wireless service](#)

Joint development brings AI-ready, automated monitoring and real-time service assurance to indoor distributed antenna system and private network deployments

- April 02, 2026 02 Apr'26

[North America drives video telematics market to 22 million units by 2030](#)

Study from M2M/IoT market research firm finds installed base of active video telematics systems growing at a steady clip driven by North America and camera technology enhancements

- April 02, 2026 02 Apr'26

[Marvell scales up networking to extend Nvidia AI ecosystem](#)

AI GPU leader sees extension of AI infrastructure through collaboration with infrastructure technology to deliver more choice and flexibility for customers with fully compatible systems

- April 02, 2026 02 Apr'26

[How 'Wikipedia of cyber' helps SAP make sense of threat data](#)

SAP runs enormous cloud environments for some of the world's most heavily-regulated organisations, and in the hyperscale era, data security and compliance were becoming big challenges. It turned to cutting-edge agentic tools from Uptycs to cut ...

- April 02, 2026 02 Apr'26

[Net Insight introduces programmable video production network](#)

Capability designed to make large-scale IP-based live production infrastructures more predictable and controllable, enabling secure and automated IP interconnection without reverting to SDI gateways

- April 02, 2026 02 Apr'26

[NHS digital drive hit by usability gaps despite progress, national survey finds](#)

The shift from analogue to digital across the NHS is hindered by usability issues in electronic patient record (EPR), but the newly launched frontline productivity programme could be the answer

- April 02, 2026 02 Apr'26

[Wireless AI paradox emerges as Wi-Fi evolves into strategic growth engine](#)

Research finds businesses must adapt to diverse connectivity needs, and support a growing spectrum of users and devices including employees, contractors, robots, sensors and AI applications

- April 02, 2026 02 Apr'26

[Fujitsu injects another £80m into UK arm amid Post Office scandal fallout](#)

IT services provider's UK arm has received a further £80m from parent company headquarters in Japan

- April 02, 2026 02 Apr'26

[What's driving Oracle's latest job cuts?](#)

Thousands of job losses have been reported, affecting many roles at Oracle Cloud Infrastructure including software engineering and product compliance

- April 02, 2026 02 Apr'26

[Data dive: Government 2030 datacentre capacity targets look shaky](#)

We look at UK datacentre capacity – current and projected – and find DSIT's 2030 target for 6GW of AI-capable capacity is currently out of reach, unless operators get a move on

- April 02, 2026 02 Apr'26

[NCSC warns high-risk individuals of Signal and WhatsApp social engineering attacks](#)

NCSC advises on countermeasures for high-risk individuals over phishing attacks on encrypted messaging services, such as Signal, WhatsApp and Facebook Messenger

- April 02, 2026 02 Apr'26

[How ANZ firms are driving automation and AIOps](#)

Tech leaders from Westpac, NAB, Telstra and ACC New Zealand share their automation journeys, from overcoming cultural resistance to the cautious adoption of AI

- April 02, 2026 02 Apr'26

[Arm works with IBM to deliver flexibility on mainframe](#)

The chipmaker has begun collaborating with IBM on a dual architecture for Z series machine

- April 01, 2026 01 Apr'26

[AI driving changes in Nordic financial services](#)

Traditional Nordic financial services businesses are reshaping to take on a new breed of competition

- April 01, 2026 01 Apr'26

[AI-driven operating model key to cloud-native, autonomous networks](#)

Operator-driven guidance outlines how mobile network operators can adopt AI-based operating models to enable increasingly autonomous network operations

- April 01, 2026 01 Apr'26

[Microsoft to invest \\$5.5b in Singapore's AI and cloud infrastructure](#)

The tech giant is spending over \$5bn through 2029 to bolster its footprint in the city-state while rolling out programmes to equip students, educators and non-profit leaders with AI skills

- April 01, 2026 01 Apr'26

[SpaceLocker launches first shared satellite mission](#)

French startup looks to redefine space infrastructure by turning satellites into shared platforms, and claims faster, more sustainable missions

- April 01, 2026 01 Apr'26

[Post Office scandal supplier Fujitsu to cut nearly 10% of UK workforce](#)

Troubled IT supplier announces voluntary redundancy programme with hundreds of UK jobs set to be cut

- March 31, 2026 31 Mar'26

[Aussie AI health-tech Heidi aims to cure clinical burnout](#)

Armed with over \$100m in funding, Melbourne-based Heidi is building its own AI models and launching wearable hardware to automate documentation and reduce the administrative burden on doctors

- March 31, 2026 31 Mar'26

[Delta in-flight connectivity takes off with Amazon Leo](#)

Global airline looks to satellite provider to introduce connectivity on hundreds of aircraft, starting with an initial installation on 500 aircraft in 2028, working to expand its Wi-Fi and seatback experiences

- March 31, 2026 31 Mar'26

[High Court dismisses judicial review against eVisa system](#)

The High Court rules that the Home Office is acting lawfully in refusing to issue alternative proof of immigration status outside of its electronic visa system, but both the judge and the department accepts that those affected by data quality and ...

- March 31, 2026 31 Mar'26

[CityFibre launches 8.5Gb service across wholesale multi-gig network](#)

UK's largest independent full-fibre platform provider makes the next step in its roll-out of its 10Gb-capable network, and claims strong customer growth continuing as it approaches one million users

- March 31, 2026 31 Mar'26

[Cato Networks unveils modular adoption model for SASE platform](#)

SD-WAN, SSE, AI security and UZTNA standalone modules at heart of a converged platform that unlocks operational simplicity, resilient connectivity and stronger security

- March 31, 2026 31 Mar'26

[CMA to launch strategic market status investigation into Microsoft; Amazon Web Services off the hook](#)

CMA to investigate whether Microsoft should be given strategic market status. Amazon escaped, but both companies will need to make changes to egress fees and interoperability

- March 31, 2026 31 Mar'26

[Virgin Media O2 accelerates UK 5G upgrade programme](#)

UK operator inks multi-year agreements with strategic essential equipment partners to upgrade radio access network to next-generation 5G technology, boosting capacity, coverage and reliability

- March 31, 2026 31 Mar'26

[Shrinking PQC timeline highlights immediate risk to data security](#)

Google's decision to move up its timeline for migration to post-quantum cryptography highlights that some of the cyber security risks posed by quantum computing are already reality

- March 31, 2026 31 Mar'26

[Agoda scales AI strategy, opens new APAC tech hub](#)

The digital travel platform has set its sights on becoming an AI-powered travel companion as it changes how it builds software and moves its tech workforce into a new facility in Bangkok

- March 30, 2026 30 Mar'26

[Orange steams ahead in French railway connectivity](#)

Analysis of data across 20 major French rail corridors reveals sharp operator disparities in throughput, latency and quality of experience

- March 30, 2026 30 Mar'26

[Cambridge Mobile Telematics lands \\$350m strategic investment](#)

Major investment in automotive telematics company, accompanied by new long-term commercial agreements, seeks to expand global road safety platform and real-time AI risk models

- March 30, 2026 30 Mar'26

[Mobile network operators urged to help commercialise 5G live production](#)

Private 5G connectivity provider gains support from broadcasters and tech giants to calls on mobile network operators to enable on-demand network quality for live 5G broadcasts

- March 30, 2026 30 Mar'26

[Interview: Thierry Martin, head of enterprise data and analytics, Toyota Motor Europe](#)

A sketch artist by night, and a vehicle engineer by training, Toyota Europe's data chief is bringing elements of both capabilities to bear in delivering better data insights and building a foundation for AI

- March 30, 2026 30 Mar'26

[Stop Scams steps up to online fraud challenge](#)

After years of putting the building blocks in place, Stop Scams is ready and able to react quickly to fight emerging fraud threats

- March 30, 2026 30 Mar'26

[Starlink reshapes satellite communications as industry enters terabit era](#)

Lower-cost capacity, rapid scaling and improved service quality are all factors resetting expectations across the satcom market, with the entire ecosystem being pushed to innovate, differentiate and rethink strategic positioning

- March 29, 2026 29 Mar'26

[Advancing to the next frontier of AI](#)

As AI agents move faster than software made for human users, both digital tooling and silicon architecture need to be redesigned to reduce latency and power bottlenecks, according to chief scientists of Nvidia and Google

- March 27, 2026 27 Mar'26

[Pave Space raises \\$40M to hasten satellite deployment](#)

Swiss startup building orbital transfer vehicles capable of delivering satellites to operational orbits in under 24 hours, addressing a growing bottleneck in the space economy

- March 27, 2026 27 Mar'26

[UK government lacks ambition to fight tax fraud, says PAC](#)

The Public Accounts Committee says the UK government has dropped the ball on the use of data analytics to tackle tax fraud and error, as the public purse haemorrhages billions of pounds

- March 27, 2026 27 Mar'26

[Lloyds admits coding fault exposed customer transactions](#)

The bank has responded to the Treasury Committee's request for information on a major data breach in its banking app

- March 27, 2026 27 Mar'26

[Virgin Media Business Wholesale accelerates high-capacity delivery in the UK](#)

Fixed wholesale connectivity arm of leading UK operator announces biggest ever upgrade to its wholesale network, delivering 32% Ethernet lead time reduction and 10G delivery accelerated by up to 40 days

- March 27, 2026 27 Mar'26

[Flaws in government procurement show in HMRC £473m AWS award](#)

After a rushed contract award with only one bidder and a tender notice 'for hyperscalers only', critics call for live oversight on government contracts, claiming the procurement is unfair and likely to be expensive

- March 27, 2026 27 Mar'26

[Antevia joins O-RAN Alliance to simplify enterprise 5G deployment](#)

Private network technology provider looks to strengthen commitment to development of open, interoperable and simplified enterprise cellular deployments and scale enterprise 5G

- March 27, 2026 27 Mar'26

[Second Post Office Capture conviction referred to appeal court](#)

Conviction of 30 years has been referred to the Court of Appeal by the Criminal Cases Review Commission

- March 27, 2026 27 Mar'26

[Colt announces subsea, terrestrial network routes](#)

Digital infrastructure company reveals plans to launch international connectivity routes connecting the US West Coast to Asia, marking the latest phase of its major global network expansion

- March 27, 2026 27 Mar'26

[Capita left to deal with 13,000 civil service pension cases over a year old](#)

More details of the Civil Services Pension Scheme administration backlog left to Capita revealed in parliamentary committee hearing

- March 27, 2026 27 Mar'26

[EU Parliament rejects Chat Control message scanning](#)

MEPs vote down proposals to allow US tech companies to continue scanning private messages for illegal content

- March 26, 2026 26 Mar'26

[Oracle opens Sydney customer excellence centre to boost AI adoption](#)

Facility will help organisations across Australia and Oceania navigate technology challenges and turn AI experimentation into business value

- March 26, 2026 26 Mar'26

[Oracle Cloud Infrastructure: The bare metal facts](#)

The Oracle Cloud Infrastructure appears to have more in common with datacentre hosting than with public infrastructure-as-a-service providers

- March 26, 2026 26 Mar'26

[Nokia joins Linx as technical partner for London network refresh](#)

Internet exchange based in UK capital completes project refreshing its 17-site interconnected network in London, with global comms tech provider selected as the technical partner to support development

- March 26, 2026 26 Mar'26

[Proptivity, Telehouse team for reliable indoor 4G, 5G in London workplaces](#)

Datacentre service provider and indoor mobile infrastructure firm look to address connectivity blind spot inside modern office buildings, enabling scalable indoor 4G, 5G across London workplaces via neutral host

model

- March 26, 2026 26 Mar'26

[Post Office still can't find evidence for 1,400 scandal redress claimants, while people die waiting](#)

Finding evidence for events that took place decades ago is a challenge for many subpostmasters seeking compensation through the Horizon Shortfall Scheme

- March 26, 2026 26 Mar'26

[Filtronic unveils DIFI service to enable virtualised satellite ground stations](#)

Space, defence and telecoms infrastructure provider intros high-bandwidth digital intermediate frequency tech designed to support the transition to fully virtualised satellite ground stations
