

# Knowledge Now | Netenrich

Archived: 2026-04-05 18:30:04 UTC

## Our Threat Intelligence Has Evolved — Now Powered by Google

Our Threat Intelligence capabilities are now part of a unified experience inside Netenrich Adaptive MDR, powered by Google Threat Intelligence. This integration enables deeper visibility, real-time enrichment, and AI-driven context across global threats, vulnerabilities, and campaigns.

### Why This Evolution Matters

Traditional dashboards showed data — but Adaptive MDR turns that data into defense.

By integrating with Google Threat Intelligence, we're delivering context-aware insights that connect threats to your assets, controls, and risk posture.

### What's Changing

We're consolidating our public threat dashboard into our Adaptive MDR platform experience.

As part of this evolution, the **KNOW** (Knowledge Now) platform has been **discontinued** on **31 Oct 2025**.
