

Sándor Nemes - Spying on botnets

Published: 2018-03-18 · Archived: 2026-04-05 12:36:38 UTC

This talk will give a quick overview about the methods of collecting threat intelligence data on various malware families and botnets. How is it possible to find out what different threat actors are currently up to and what countries do they target? Security teams are always one step behind the bad guys, but through our work, we ensure to make this step as small as possible. ...
