3

## **Integrating Your Systems**

Then, connect your existing systems effortlessly, creating a cohesive and unified IT environment.

4

## **Automate**

Finally, automate key processes to enhance efficiency, unlocking the full potential of Pulseway for proactive management.

"We have been using Pulseway for a number of years and I have to say it is one of the tools as a Sys Admin, I could not be without. It's a first line of defence against any imaginable issue your servers may face"

"I like the particularity that this system has to be able to integrate amounts of third-party services, among which we can mention are Zendesk, Slack, Pagerduty, etc, that can expand solutions that help to obtain greater value of infrastructure management services."

Peter P.

Software Project Manager, Computer Software

"It took very little time and we were up and running. Now we manage most of our everyday tasks from our smartphones. The best part is that Pulseway alerts us to any issues before users even notice any slow-downs."

Eugene Chan

Deputy Director Digital Services, University of Auckland Business School
