The first mobile-centric security platform

MobileIron was founded in 2007 by Ajay Mishra and Suresh Batchu as the industry’s first mobile-centric, zero trust platform built on a unified endpoint management (UEM) foundation. MobileIron’s mobile-centric, zero trust approach ensured that only authorized users, devices, apps and services could access business resources. The company went public in 2014, trading under the ticker symbol MOBL.

MobileIron was [acquired by Ivanti](#) on December 1, 2020.

MobileIron Products

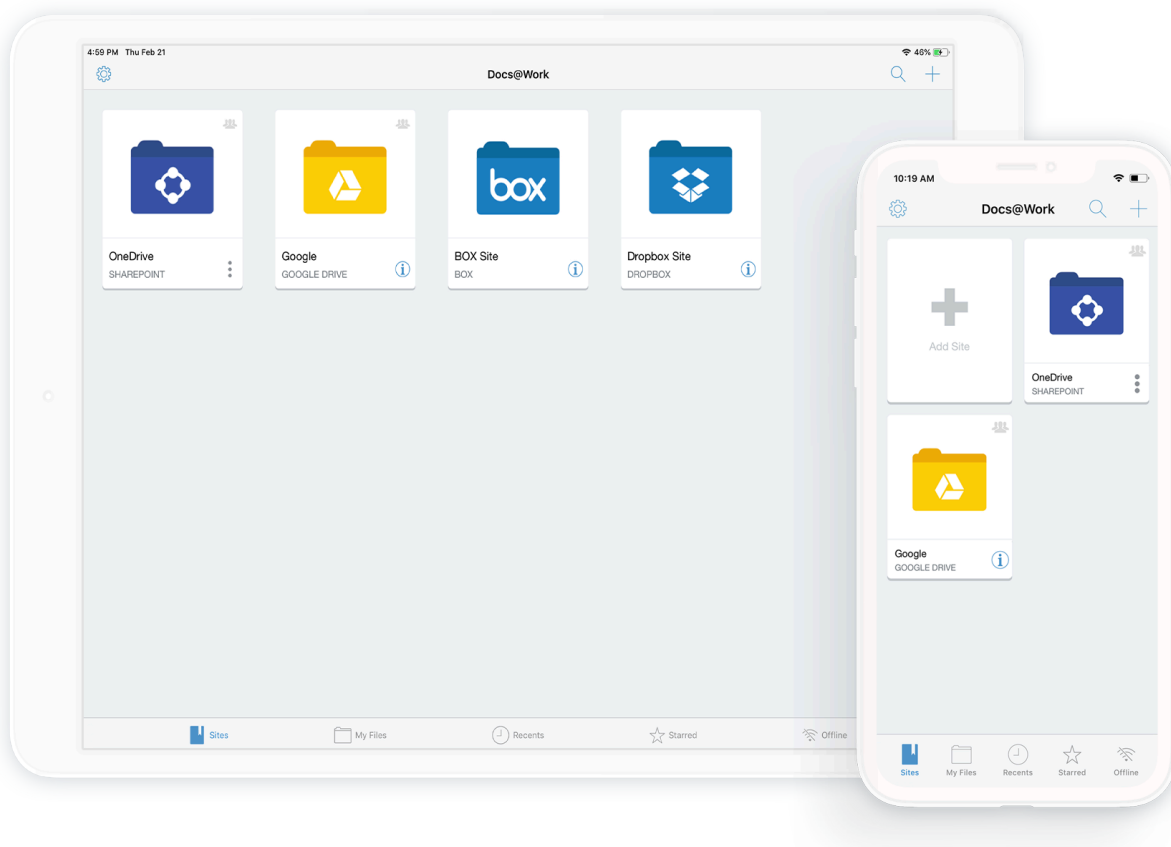

The MobileIron platform was built to secure and manage corporate data in a world where people access cloud data using mobile devices and modern endpoints.
