

## Guide: Scattered Canary Threat Dossier

Archived: 2026-04-25 02:02:18 UTC

Business email compromise (BEC) has continued to grow into a billion-dollar industry as cybercriminals turn to it as their preferred scam. But with the West African gang we've named Scattered Canary, we have deeper insight into how BEC is connected to the rest of cybercrime, and why it has grown in recent years.

Download the threat dossier to learn:

- How Scattered Canary grew from a one-man startup into a BEC enterprise
- How the group has diversified its revenue streams with romance scams, tax fraud, and more
- Which scams have been most successful, and how we can fight against them
- Why we should look at cybercrime from a holistic approach based on threat actor identity rather than type of activity
