## Tool: GOGGLES

Names	GOGGLES TROJAN.FOXY
Category	<a href="#">Malware</a>
Type	<a href="#">Downloader</a>
Description	<p>(<a href="#">Citizen Lab</a>) a simple downloader that is controlled via encoded markers in files accessed over HTTP.</p> <p>The C2 communication method, commands, and particularly the data encoding method in GOGGLES are very similar to the sample we analyzed. The connection was initially noticed due to a shared string used in decoding methods, and the presence of the same two commands for each program. Follow-up code analysis confirmed that these programs share much of the same code, and use the same C2 server. It is very likely that GOGGLES is a later version of <a href="#">GLASSES</a>.</p>
