NAME:

Lamberts

Alias:

Longhorn , APT-C-39

Description:

Lamberts is an attack group disclosed and named by Symantec. It has been active since at least 2011, and targeted at least 40 targets by using spying tools and operational protocols detailed in the recent Vault 7 leak. The targets, compromised by advanced malware tools and zero-day vulnerabilities, are located in at least 16 countries across the Middle East, Europe, Asia, and Africa.
