Multi-Platform Remote Control and Support Software

For the last 36 years, NetSupport Manager, our remote monitoring and management solution has been recognised as the perfect tool for helping companies deliver seamless remote IT support and remote device management – from anywhere to anywhere!

Join NetSupport at

ExCel London
13th - 14th May

Stand 651

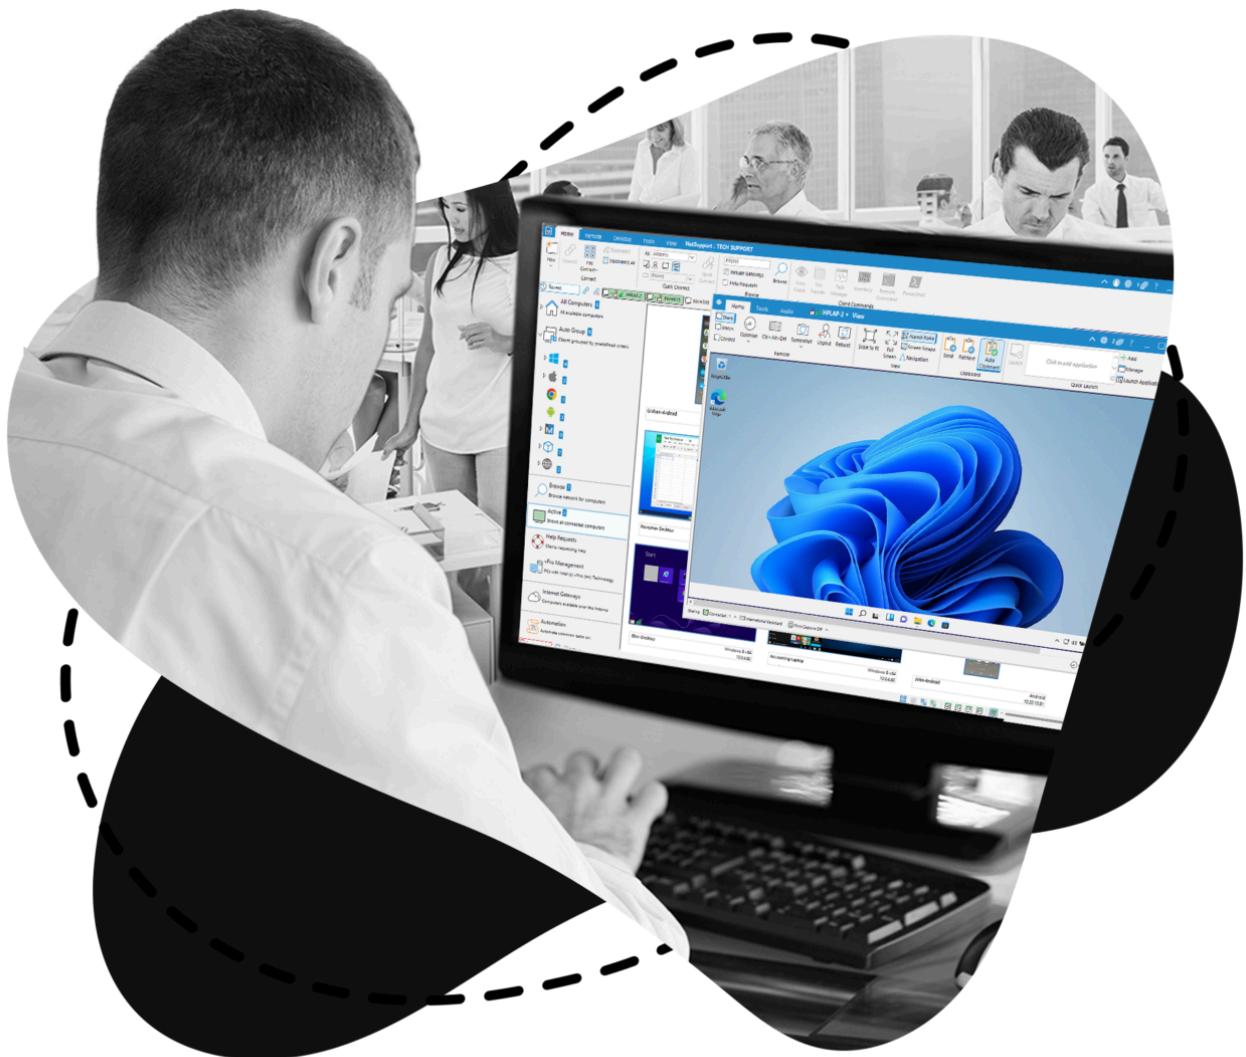

Messe Berlin, Germany
30th June - 1st July

Pod G, UK pavilion

Fast connection

NetSupport Manager is designed to work over a LAN, WAN or the internet, with support for both TCP/IP and HTTP communications (and even legacy IPX and NetBIOS support).

Easy-to-use and effective software. If you want to save time and manage a lot of PCs, then buy NetSupport Manager.

– Volkswagen Sachsen GmbH

Multi-platform support

Remotely support any Windows, Mac, Linux (legacy) and/or Chrome OS desktop, as well as a range of mobile devices, from your Windows PC, Mac, Apple iOS/Android tablet or smartphone.

On-premises remote support perfection – NetSupport Manager delivers a wealth of valuable features at SME-friendly prices.

– PC Pro

Manage devices simultaneously

NetSupport Manager provides one-to-many support, not just 1:1, meaning you can scan and view multiple screens in sequence via unique real-time thumbnails.

We've used NetSupport for a number of years now and will continue to use it for years to come.

– MLR Networks

Systems management

From detailed hardware/software inventory, and grouping devices into a clear hierarchy to remote command prompt and registry editor, gain a detailed overview of your IT infrastructure.

NetSupport Manager

What are the key benefits?

1

Flexibility

With its multi-platform support and flexible network options, IT teams have immediate access to their organisation's critical systems, servers and IT users, helping them to quickly respond to IT issues across multiple

sites in any geographical location.

}

Efficiency

Its unique range of supporting tools ensures maximum efficiency and, most importantly, the minimum level of system downtime and lost productivity as support issues are being addressed.

Security

As a fully secure ‘on premise’ solution, IT teams can carry out seamless remote support via its unique Gateway – and with its PIN connect feature and four levels of encryption, it’s the choice of military and financial institutions across the globe.

Why organisations switch to NetSupport...

Behind every chat, phone call and email is a real person. We provide free support from Monday to Friday, 9am–5pm, across global time zones.

Onboarding and ongoing support are included as standard. Plus, we have a dedicated pre-sales team to support you through your trial period.

It’s intuitive, so you won’t need it, but if you do need a hand, free online training is available.

We offer consistent, reliable pricing that doesn’t break your budget. There are no surprises, especially with ‘buy once and own forever’ options!
