

# LockBit updates leak site with post about Sud-Francilien hospital - DataBreaches.Net

Published: 2022-09-12 · Archived: 2026-04-09 02:13:02 UTC

After weeks of information and misinformation leaking out, and after some outstanding reporting by Valéry Rieß-Marchive on LeMagIT, LockBit 3.0 has publicly confirmed that they are responsible for the attack on South Francilien Hospital Center (CHSF).

The screenshot shows the LockBit 3.0 website interface. At the top left is the LockBit 3.0 logo. To its right is a red banner with the text "LEAKED DATA". Further right are navigation links for "TWITTER", "PRESS ABOUT US", "HOW TO BUY BITCOIN", "AFFILIATE RULES", "CONTACT US", and "MIRRORS". The main content area features a large red countdown timer displaying "UNTIL FILES 9D23H26M56S PUBLICATION". Below the timer, a red text indicates the "Deadline: 22 Sep, 2022 12:53:38 UTC". The central part of the page contains a post about "ch-sf.fr", the Centre Hospitalier Sud Francilien. The post includes the clinic's logo, name, and revenue (\$650 million). It states that the company does not want to fulfill its part of a transaction to buy out the decryptor and personal data of its customers, patients, and partners. It also mentions that the company does not care about the leakage of such data as personal cards of customers, medical history, test results, doctors' diagnoses, and personal confidential information of clients. The post concludes with a red warning: "ALL AVAILABLE DATA WILL BE PUBLISHED!". At the bottom of the page, there are three green buttons with corresponding prices: "EXTEND TIMER FOR 24 HOURS" for \$10,000, "DESTROY ALL INFORMATION" for \$1,000,000, and "DOWNLOAD DATA AT ANY MOMENT" for \$1,000,000.

*Weeks after everyone knew that LockBit was responsible for the attack, they added the hospital to their leak site and gave them nine more days to respond.*

Consistent with the usual rhetoric we see from threat actors in such circumstances, LockBit tries to put responsibility on their victim, and claims “We have given this company a very reasonable price as we respect healthcare.”

The extortion demands are \$10,000 to delay publication for 24 hours more; \$1 million to destroy all the data, and \$1 million to buy all the data. Claims that the original demand was \$10 million were inaccurate.

LockBit claims to have more than one million files from the hospital.
