## Tool: RDP

Names	RDP Remote Desktop Protocol
Category	<a href="#">Tools</a>
Type	<a href="#">Backdoor</a>
Description	<p>(<a href="#">Wikipedia</a>) Remote Desktop Protocol (RDP) is a proprietary protocol developed by Microsoft, which provides a user with a graphical interface to connect to another computer over a network connection. The user employs RDP client software for this purpose, while the other computer must run RDP server software.</p> <p>Clients exist for most versions of Microsoft Windows (including Windows Mobile), Linux, Unix, macOS, iOS, Android, and other operating systems. RDP servers are built into Windows operating systems; an RDP server for Unix and OS X also exists. By default, the server listens on TCP port 3389 and UDP port 3389.</p>
