Can't believe this isn't behind a paywall

Honestly I've paid for similar tools that do less. This lets you search through expired domains and filter down by authority, keywords, backlink stuff, even what platform they're being sold on. And it updates constantly. Feels like a cheat code tbh.

Free and no login required, love that

I hate tools that make you sign up before you can even try them. This one just works. I use it to find domains for client projects — it's quick, gives Moz and Majestic scores, and some other custom data I've not seen elsewhere. Would happily pay for it, but glad I don't have to!

Takes a bit to get used to but super helpful

Not the fanciest UI in the world, but the data is solid. It took me a bit of clicking around to learn how to get what I need, but once I did, it's saved me hours. If you're into SEO or domaining, this is a no-brainer.

Honestly didn't expect it to be this good

Saw this recommended on a forum and didn't expect much, but wow. The amount of data it shows is crazy for a free tool. I use it mostly to look for brandable names and cross-check SEO value. Already registered a couple. Definitely bookmarking this.

Good for flipping or just grabbing brand names

Been using ExpiredDomains for about a month and I've already picked up a few solid names — one of them's already flipped. The name value and SEO price estimates are really handy. I wish the design was a bit cleaner but functionally, it's spot on.

Great for finding niche domains I run a few small affiliate sites and I'm always looking for expired domains with decent backlink profiles. ExpiredDomains saves me a ton of time. Filters are a bit overwhelming at first but once you figure it out, it's so much faster than doing it manually. Found 3 great ones last week.

Frequently Asked Questions Your queries answered

What is ExpiredDomains.com?

ExpiredDomains.com is a free online platform that helps users find valuable expired and expiring domain names. It aggregates domain data from hundreds of top-level domains (TLDs) and displays them in a searchable, filterable format. Whether you're seeking domains with SEO authority, existing traffic, or strong brand potential, the platform provides tools and insights to support smarter decisions.

Is there a cost to use the platform?

No, the platform is completely free to use. You can browse listings, view metrics, and apply filters without needing to sign up or pay any fees. There are no hidden charges or usage restrictions.

Can I register domains directly through the site?

No, ExpiredDomains.com does not register domains itself. Instead, it connects you to trusted external registrars and marketplaces like GoDaddy. You'll be directed to complete your purchase or place a bid through their platform.

How often is the domain data updated?

The domain data is updated daily to ensure you're always seeing the most current listings, prices, and metrics. This includes newly expired domains, auction updates, and fresh insights from third-party tools and proprietary systems.

What tools and filters are available on the platform?

You can filter domains by TLD, keyword, length, backlink profile, SEO score, traffic estimates, and more. The platform also includes proprietary metrics like Estimated Auction Price, BrandRank, and SEO Price, alongside trusted data from sources like MOZ and Majestic.

GoDaddy

As the world's largest domain registrar with over 20 million customers, GoDaddy manages more than 84 million domains, offering a robust platform with 24/7 customer support and a wide range of TLDs. Its user-friendly interface and comprehensive services, including hosting and website builders, make it ideal for businesses seeking an all-in-one solution.
