### Why Proofpoint

## Two million customers including 83 of the Fortune 100 rely on Proofpoint security solutions

AI is transforming the digital workspace and giving rise to the agentic workspace, where every collaboration—whether by a person or an AI agent—introduces new risks.

We give organizations the security solutions they need to protect their people and secure their data while embracing the AI revolution.

[Discover Why Proofpoint](#)

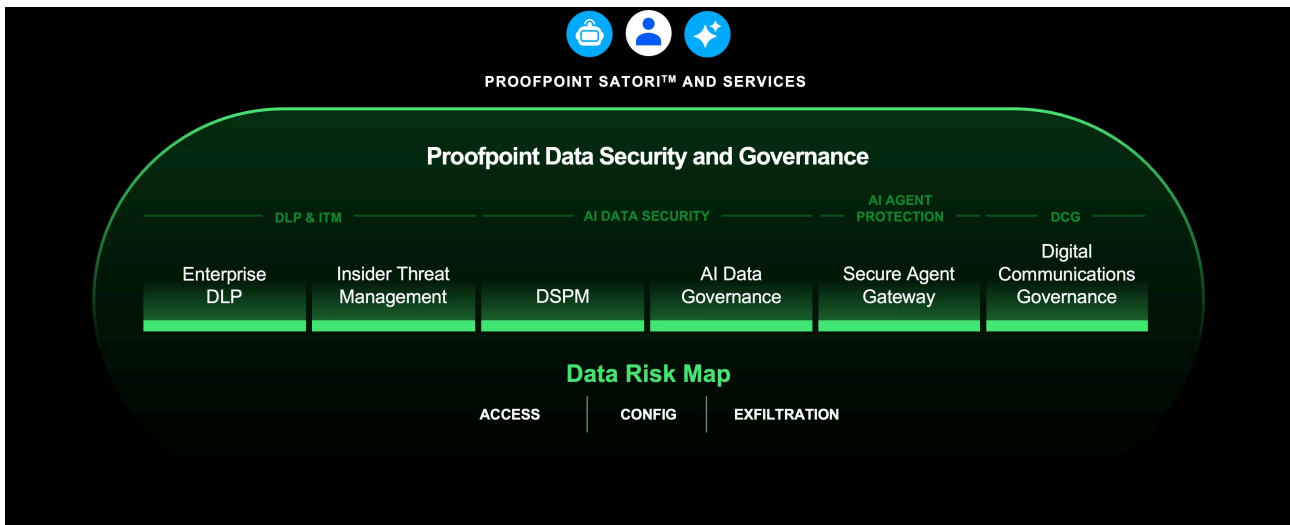

### Collaboration Security

## Stop all human-centric and AI-centric threats

Protect humans and agents from threats targeting them across all points of collaboration—email, messaging tools, social media platforms, cloud apps, and file-sharing services with world leading AI-based detection.

[Learn more](#)

### Data Security and Governance

## Safeguard information and digital communications

Careless users mishandle it. Malicious users walk out with it. Compromised user accounts are hijacked to steal it. And with the rise of the agentic workspace, non-compliant users, agents or AI tools abuse it. Proofpoint’s unified approach shows you where your data is, who or what has access to it—and helps you protect it.
