## Tool: GCMAN

Names	GCMAN
Category	<a href="#">Malware</a>
Type	<a href="#">Banking trojan</a>
Description	( <a href="#">Kaspersky</a> ) The initial infection mechanism is handled by spear-phishing. A financial institution is targeted with e-mails carrying a malicious RAR archive. When the RAR archive is opened an executable is started instead of a Microsoft Word document, resulting in infection. The group also plants a cron script into the bank's server to generate financial transactions at the rate of \$200 per minute.
