Tool: H-Worm

Names	H-Worm H-Worm RAT Houdini RAT Houdini Hworm Njw0rm Iniduoh Jenxcus Kognito WSHRAT dinihou dunihi
Category	Malware
Type	Backdoor , Info stealer
Description	(FireEye) H-worm is a VBS (Visual Basic Script) based RAT written by an individual going by the name Houdini. We believe the author is based in Algeria and has connections to njq8, the author of njw0rm and njRAT /LV through means of a shared or common code base. We have seen the H-worm RAT being employed in targeted attacks against the international energy industry; however, we also see it being employed in a wider context as run of the mill attacks through spammed email attachments and malicious links.
