Information, tools, and signatures around the Conficker computer worm

This repository contains information around the Conficker computer worm, as well as signatures to detect it and code to remediate infections.

- The `signatures` folder contains YARA rules to detect unpacked variants of the worm in memory and Snort rules to detect exploitation attempts in a network.
- the `samples` folder contains unpacked versions of each Conficker generation for reference. They contain malicious code - handle with care.

The data in this repository is (C) 2008-2018 by Tillmann Werner
