Tool: DvDupdate.dll

Names	DvDupdate.dll
Category	Malware
Type	Loader
Description	<p>(Kaspersky) This is a service DLL, but with all the same exports you would expect from a COM object. Basically, it's a payload loader.</p> <p>The whole code is obfuscated with different Windows API calls and loops. It wasn't designed to confuse a reverse engineer or to make reverse engineering harder, but to bypass some simple AV emulation engines.</p>
