CrowdStrike 2026 Global Threat Report

CrowdStrike 2026 Global Threat Report

- 27 sec:** the fastest recorded eCrime breakout time
- 89%** increase in attacks by AI-enabled adversaries
- 82%** of detections in 2025 were malware-free

AI threats have reached a critical turning point

Increase in attacks by AI-enabled adversaries

AI is now a dual threat: It acts as a force multiplier for cyberattacks while introducing a new attack surface.

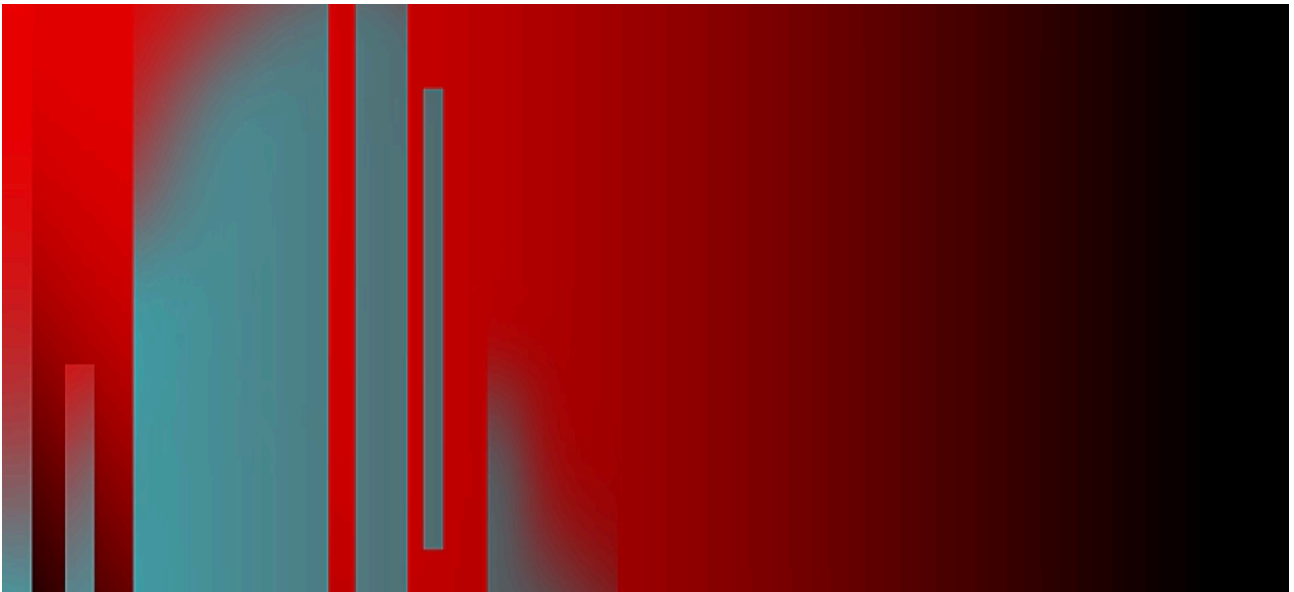

90+ organizations had legitimate AI tools exploited to generate malicious commands and steal sensitive data.

ChatGPT was mentioned in criminal forums **550%** more than any other model.

The race against time: breakout speed accelerates

The race against time: breakout speed accelerates

As adversaries move faster than ever, the window for detection and response continues to shrink, demanding real-time visibility and automated response capabilities.

27 sec

Fastest eCrime breakout time on record

65%

Increase in average breakout speed year over year

Edge device and cross-domain attacks escalate

Edge device and cross-domain attacks escalate

By exploiting visibility gaps, adversaries move fluidly across identity, cloud, and virtual environments while avoiding heavily monitored endpoints to evade detection.

40%

Of vulnerabilities exploited by China-nexus adversaries targeted edge devices

266%

Increase in cloud-conscious intrusions by state-nexus threat actors

Know them. Find them.

Stop them.

Explore the Adversary Hub to learn how the world's most dangerous threat actors are targeting organizations like yours.

FAQs

The CrowdStrike Counter Adversary Operations team performs research that identifies new adversaries, monitors their activities, and captures emerging cyber threat developments. This intelligence is used to conduct proactive threat hunting across the customer base to enable the detection of new and evolving adversary tradecraft.
