APT group: WildPressure

Names	WilePressure (<i>Kaspersky</i>)	
Country	[Unknown]	
Motivation	Information theft and espionage	
First seen	2019	
Description	<p>(Kaspersky) In August 2019, Kaspersky discovered a malicious campaign distributing a fully fledged C++ Trojan that we call Milum. All the victims we registered were organizations from the Middle East. At least some of them are related to industrial sector. Our Kaspersky Threat Attribution Engine (KTAE) doesn't show any code similarities with known campaigns. Nor have we seen any target intersections. In fact, we found just three almost unique samples, all in one country. So we consider the attacks to be targeted and have currently named this operation WildPressure.</p>	
Observed	Sectors: Industrial , Oil and gas . Countries: Middle East.	
Tools used	Milum .	
Operations performed	Spring 2021	WildPressure targets the macOS platform < https://securelist.com/wildpressure-targets-macos/103072/ >
Information	< https://securelist.com/wildpressure-targets-industrial-in-the-middle-east/96360/ >
