

## turian (Malware Family)

By Fraunhofer FKIE

Archived: 2026-04-05 16:52:49 UTC

According to Mitre, Turian is a backdoor that has been used by BackdoorDiplomacy to target Ministries of Foreign Affairs, telecommunication companies, and charities in Africa, Europe, the Middle East, and Asia. First reported in 2021, Turian is likely related to Quarian, an older backdoor that was last observed being used in 2013 against diplomatic targets in Syria and the United States.
