

# Detection of Network Devices, Detection Strategy DET0859

Archived: 2026-04-02 12:22:16 UTC

## AN1991

Once adversaries leverage compromised network devices as infrastructure (ex: for command and control), it may be possible to look for unique characteristics associated with adversary software, if known.<sup>[1]</sup> Much of this activity will take place outside the visibility of the target organization, making detection of this behavior difficult. Detection efforts may be focused on related stages of the adversary lifecycle.
