

# Download Revealer Keylogger Free 2026 for Windows 10

Archived: 2026-04-05 13:23:29 UTC

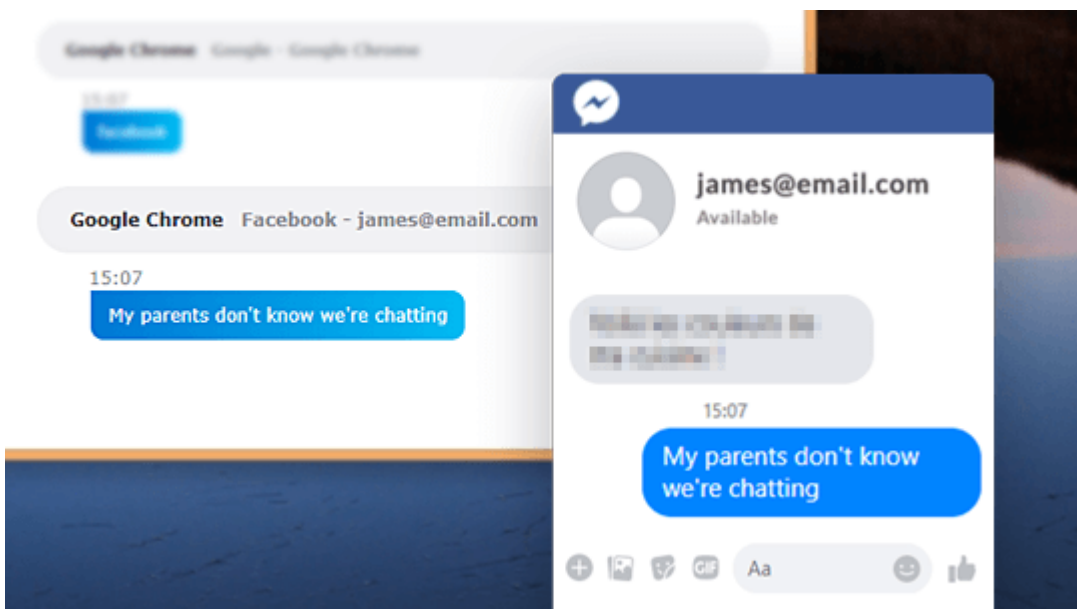

Records all the users activities on Windows computers. Revealer Keylogger combines keystroke logging, screenshot capture, and remote monitoring - all in one app.

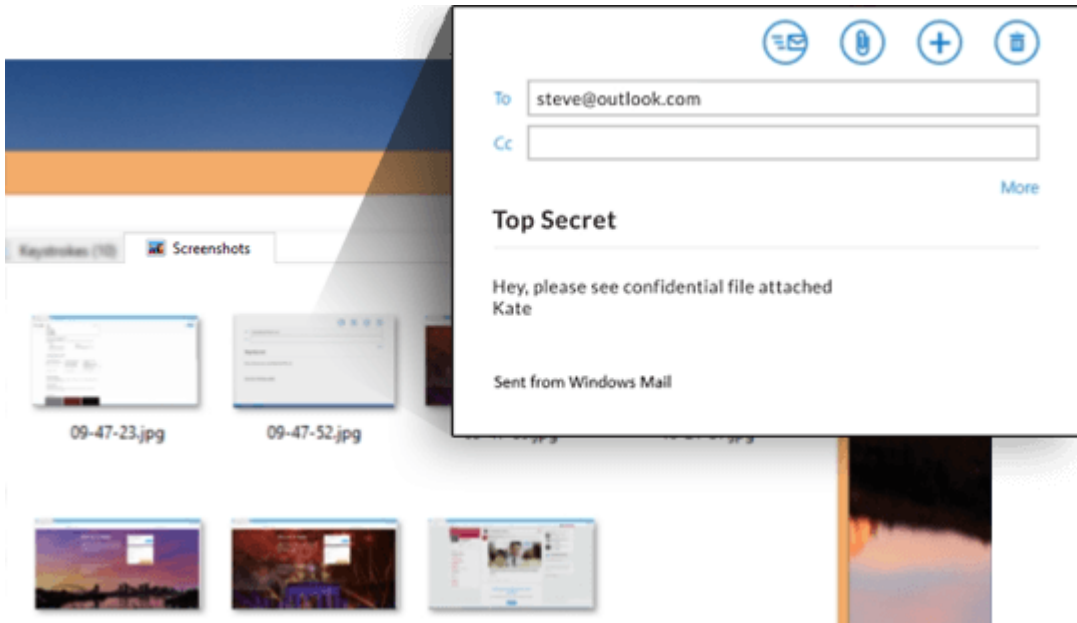

[Free download](#)

## Conversation recording

Revealer Keylogger records everything that is typed on the keyboard regardless of the application used, including passwords, conversations in social networks and text typed in Chrome private (incognito) mode.

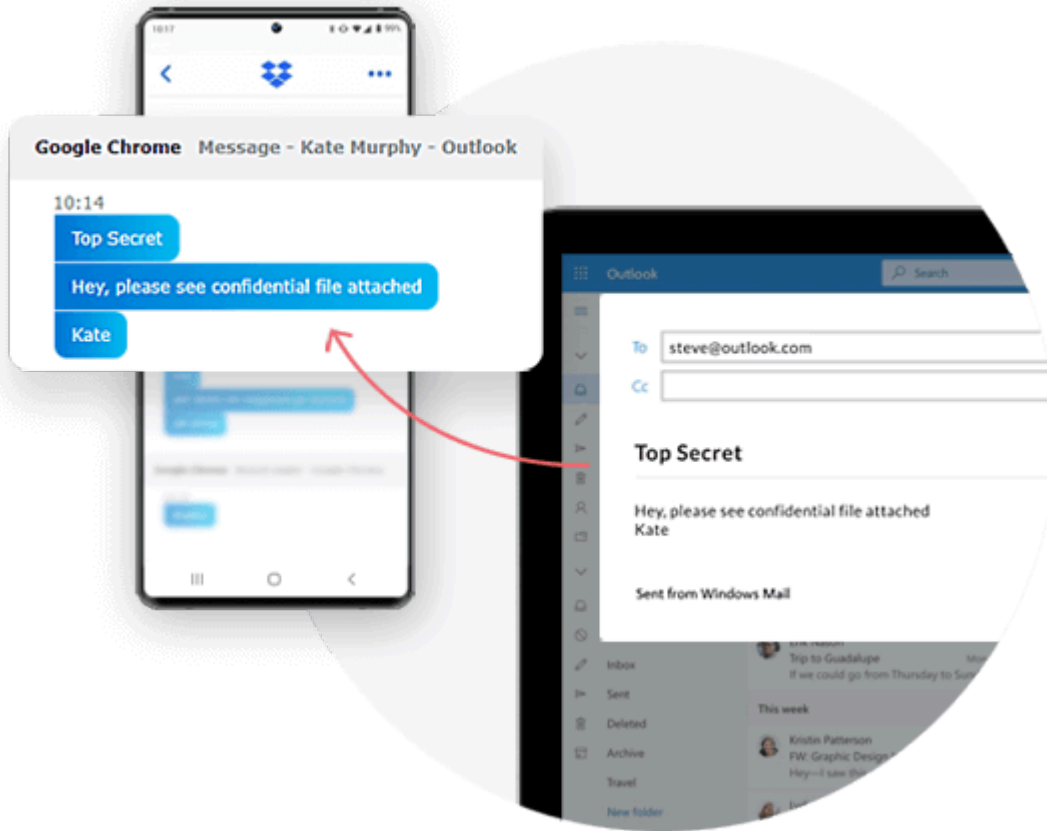

## Screenshots

With the automatic screenshot feature, watch all the actions performed on your computer. Revealer Keylogger takes a screenshot of the desktop or the active application when the user types some text or uses the mouse.

## Remote monitoring

See the recorded text from another computer, a tablet or a smartphone with delivery via email, Dropbox, Google Drive, OneDrive, FTP or LAN. You can adjust the delivery frequency to receive the logs in real time or several times per day.
