Tool: TinyTurla

Names	TinyTurla
Category	Malware
Type	Backdoor
Description	(Talos) Cisco Talos found a previously undiscovered backdoor from the Turla APT that we are seeing in the wild. This simple backdoor is likely used as a second-chance backdoor to maintain access to the system, even if the primary malware is removed. It could also be used as a second-stage dropper to infect the system with additional malware.
