Tool: August Stealer

Names	August Stealer
Category	Malware
Type	Info stealer , Credential stealer , Exfiltration
Description	(Proofpoint) During the month of November, Proofpoint observed multiple campaigns from TA530 - an actor we have noted for their highly personalized campaigns - targeting customer service and managerial staff at retailers. These campaigns utilized “fileless” loading of a relatively new malware called August through the use of Word macros and PowerShell. August contains stealing functionality targeting credentials and sensitive documents from the infected computer.
